

**Premiile pentru cele mai bune lucrări
prezentate sub formă de poster la
ROMOPTO 2009, Sibiu, 30 august-3 septembrie 2009**

Premiul I:

PD II. P.1.

High-aspect-ratio photonic structures produced by two-photon photopolymerization

M. Zamfirescu¹, F. Jipa¹, C. Luculescu¹, I. Ionita², R. Dabu²

¹ - National Institute for Laser Plasma and Radiation Physics - INFLPR, Atomistilor 409,
077125 Magurele, Bucharest, Romania

² - University of Bucharest, Faculty of Physics, Bucharest, Romania

Premiul II:

**III.P.5. Optical linear and third-order nonlinear properties of nano-porous Si
described by Bruggeman model,**

Tatiana Bazâru¹, Valentin I. Vlad¹, Adrian Petriș¹, Mihaela Miu²

¹ - National Institute for Laser Plasma and Radiation Physics - INFLPR, Atomistilor 409,
077125 Magurele, Bucharest, Romania

² - National Institute for R&D in Microtechnologies, R-02357 Bucharest, Romania

Premiul III:

**II.P.1. Spectroscopic study of the plasmas generated by nanosecond laser ablation of
Er³⁺-doped Ti:LiNbO₃ targets,**

M. Stafe, C. Neagușu, I. Vlădoiu, S. S. Ciobanu, N. N. Pușcaș
